1. Login/Register Screen:

a. Register Screen

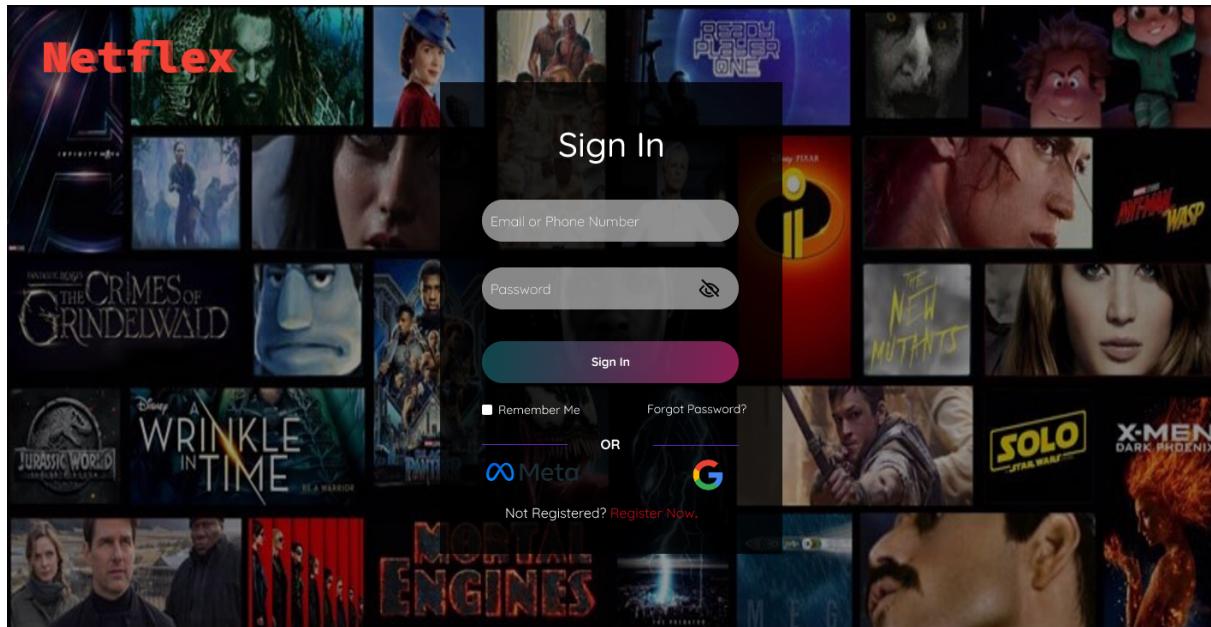

Here's a description of its purpose, what it shows, and how users can use it:

- **Purpose:** The main purpose of this Register Screen is to allow new users to create an account on the platform by entering their basic credentials and submitting them. This is a crucial step for users before they are granted access to the application via the registered account.
- **What It Shows:** The screen displays a registration form with fields allowing users to enter an email or phone number and a password. There's also a "Register" button for submitting the form. Additionally, alternative registration options via Meta (Facebook) and Google are provided and presented with their respective logos. On the top right hand corner of the screen, there's a "Sign in" option to direct users to the Login page. The background of the screen is adorned with posters from popular films like "The Shawshank Redemption," "Batman," "Jurassic Park," "Titanic," "Terminator 2: Judgment Day," "Scream," and "Reservoir Dogs."

Day," "Scream," and "Reservoir Dogs". Finally, a simple logo of "Netflix" can be found on the top left hand corner of the screen

- **How Users Can Use It:** Users can use this screen by entering their email or phone number and a password in the provided fields, then clicking the "Register" button to create their account. Alternatively, they can choose to register by linking their Meta (Facebook) or Google accounts by clicking on the designated icons. If the user already has an account, they can click on the "Sign in" option to be directed to the Login screen instead.

b. Login Screen

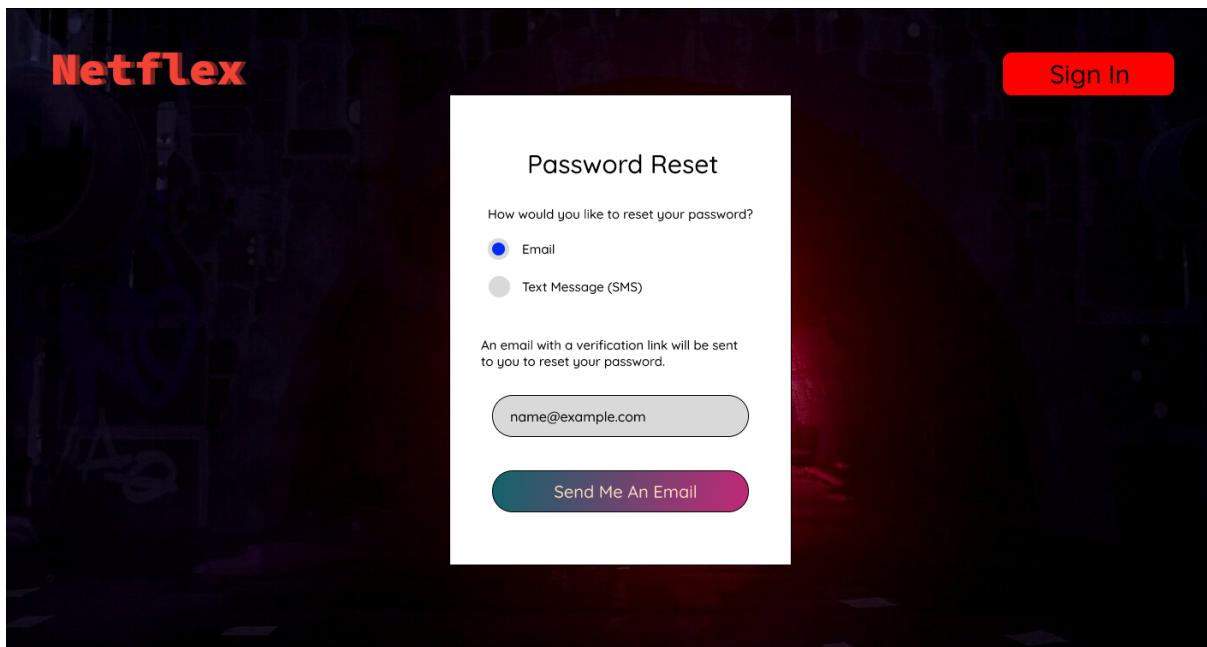

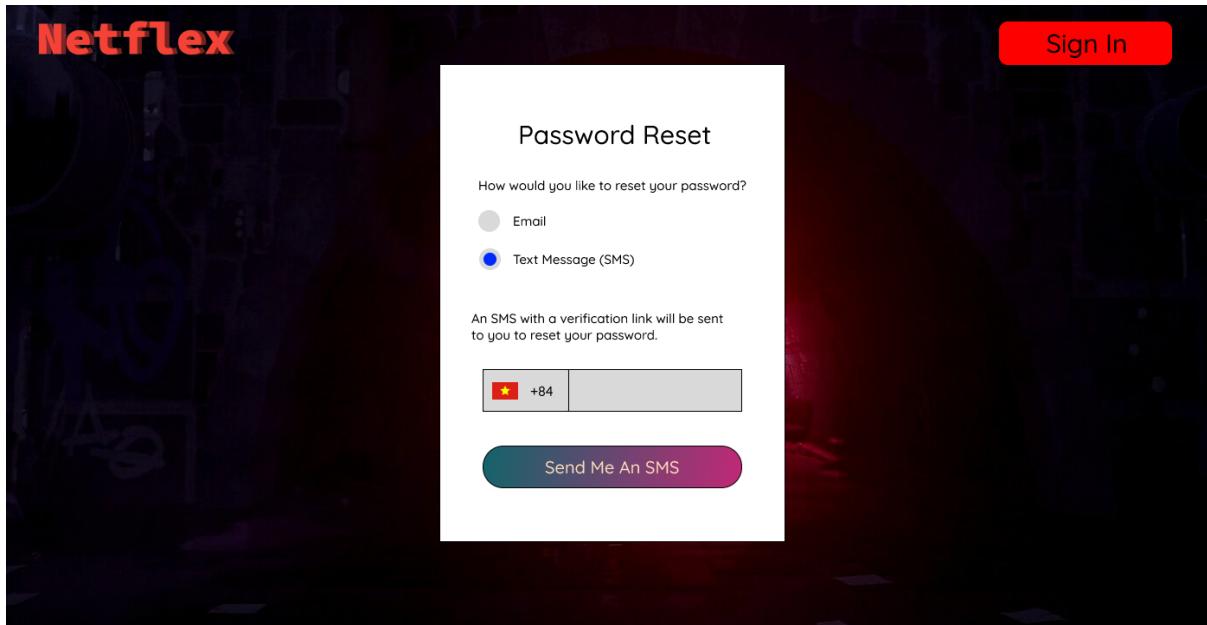

Here's a description of its purpose, what it shows, and how users can use it:

- **Purpose:** The Login Screen is designed for users to access the application by logging in with their existing accounts. This is an essential step for users to enjoy the service's features such as streaming movies.
- **What It Shows:** The screen displays a sign-in form with fields for entering the user's credentials including an email or phone number and password with a "Sign In" button for submitting the form. For convenience, options like "Remember Me" and "Forgot Password?" are available and users can also sign in using their Meta (Facebook) or Google accounts, as indicated by their

respective icons. For new users, there's a link labeled "Not Registered? Register Now," directing them to the "Register" page to create a new account. Finally, a simple logo of Netflix can be found in the top left hand corner of the screen.

- **How Users Can Use It:** Users can use this screen to login to their account by entering their email or phone number and their associated password in the provided fields, then clicking the "Sign In" button to log into the application. If they've forgotten their password, they can click on the "Forgot Password?" link to take actions to reset their password. Alternatively, they can choose to sign in using their Meta or Google accounts by clicking on the respective icons. If they're not registered yet, they can click on the "Not Registered? Register Now" link to go to the registration page.

c. Forgot Password Screen

Here's a description of its purpose, what it shows, and how users can use it:

- **Purpose:** The Password Reset Screen is designed to assist users in resetting their passwords if they have forgotten them.
- **What It Shows:** The screen displays options for the user to choose how they would like to reset their password, either via Email or Text Message (SMS). If the user chooses Email, there's an input field for users to enter their email address, pre-filled with a placeholder 'name@example.com' and a "Send Me

An Email” button below to trigger the password reset process via email. If the user chooses SMS, there's a country phone code selection field and an input field for users to enter their phone number and a “Send Me An SMS” button below to trigger the password reset process via Text Message.

- **How Users Can Use It:** Users can first access this screen by selecting the “Forgot Password” link on the “Sign In” screen, then they can use this screen by selecting their preferred method of password reset, either by Email or Text Message (SMS). They then enter their corresponding credentials in the provided field and click on the button to receive the verification link via the Email Address/Phone Number that they entered.

2. Movie Watching Screen:

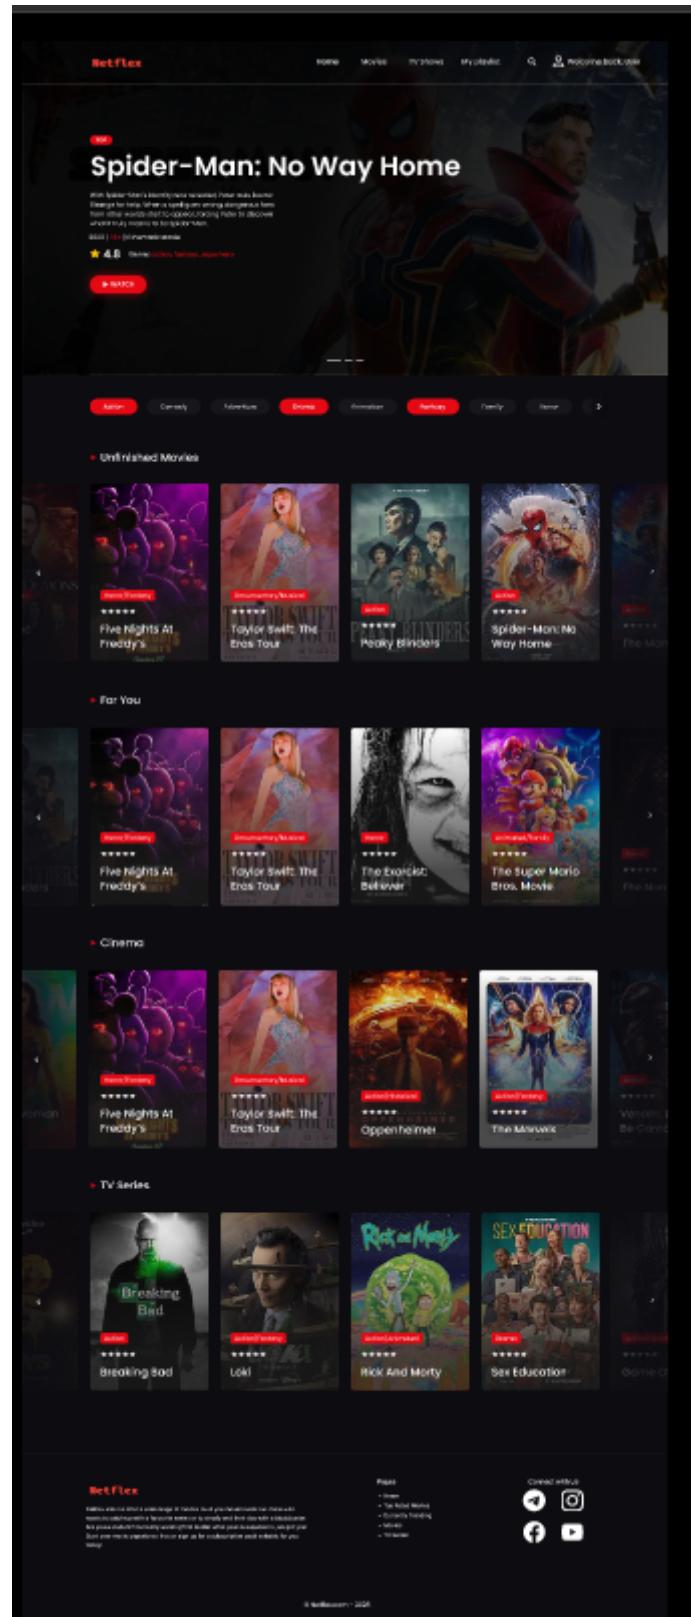

Here's a description of its purpose, what it shows, and how users can use it:

- **Purpose:** The Movie Watching Screen is designed for users to view and control the playback of a movie. This is an essential feature for users to enjoy the service's content such as movies and TV series.
- **What It Shows:** The screen displays the visual content of the movie and provides interactive buttons for user control. These include:
 - **Play/Pause Button:** Allows users to play or pause the movie.

- **Backward/Forward 10 Seconds Buttons:** Enable quick navigation within the video.
 - **Volume Slider:** Lets users adjust the audio levels of the movie.
 - **Subtitles Button:** Provides options to enable subtitles in various languages.
 - **Speed Adjustment Option:** Allows users to change the playback rate.
 - **Full-Screen Toggle Button:** Enlarges the viewing area for a more immersive experience.
 - **Movie Duration:** Displays the total length of the movie, which is 1:46:26 in this case.
 - **Name of Movie:** The movie title is displayed at the bottom center of the screen.
-
- **How Users Can Use It:** After selecting a movie to watch, users can use this screen by clicking the Play/Resume button to start watching the movie. They can move backwards or forwards by 10 seconds using the respective buttons, adjust the volume by moving the slider up and down, enable subtitles in provided languages, change the playback speed, and toggle full-screen mode for a better viewing experience. The duration of the movie helps users know the length of the content they are about to watch as well as keep track of their progress through the movie.

3. Home/Search Screen:

a. Home Screen (main screen)

Here's a brief description of the home page's purpose, what is shown when the user accesses it and how it can be used:

- **Purpose:** The Home Screen is designed to display movies of various categories in order to provide flexible selections for the user to watch. In addition, the user can also search for specific movies and navigate around the application easily. Finally, the user can also find a description of the application and access different social media pages of Netflix.
- **What is displayed:**
Overall, the website can be divided into three main parts: the header, body and the footer.

Regarding the header, a simple logo of Netflix can be found on the left corner while a simple navigation bar can be found on the right. The navigation bar consists of links to different sections of the application such as: Home, Movies (where users can go through all movies), TV Series (where users can go through all TV Series), My Playlist (where users can manage their personal playlists).

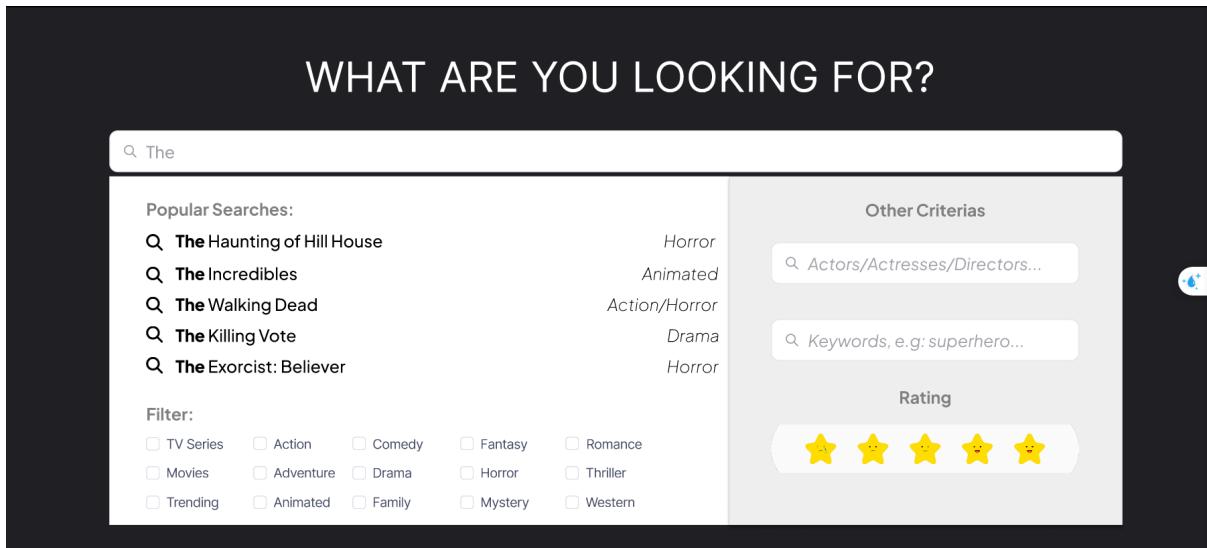

Additionally, the user can select the Search Icon to show the movie searching popup or the User Icon to perform tasks on account management.
As for the body, a large panel displaying highlighted movies can be found at the start of the body. Right below that, four subsections displaying various movie lists in the form of interactive carousels can be found, namely: Unfinished Movies (movies that the user didn't finish), For You (movies suggested to the user), Cinema (currently trending cinematic movies), TV Series (TV series suggested to the user).

Finally, in the footer section, a short description of Netflix can be found on the left side while navigational links to numerous social media accounts of Netflix can be found on the right side alongside their respective logos.

- **How can users use it:** After logging in to the application, the user is taken to the home page. The user can select either Movies or TV Series on the navigation bar to view a list of only Movies or TV Series. The user can also access their playlist collection or account management by selecting My Playlists or the user icon respectively on the navigation bar. If the user wants to search for a specific movie, the user can access the search panel via the search icon. The user can alternatively scroll through movie lists (carousels) at different sections provided in the page's body and select any movie/TV Series to watch. Finally, the user can access Netflix's Facebook, Instagram,

Telegram or Youtube page by clicking on the respective icon at the footer of the page.

b. Detailed Search (popup modal)

This is a brief description of the purpose of the modal, what is displayed within the modal and how the user can interact with it:

- **Purpose:** The Detailed Search modal serves to provide the user with an interactive interface to search for specific movies based on various criterias with filters to help optimize that process.
- **What is displayed:** A title named “What are you looking for” can be found on top of the modal, followed up by an input field to allow the user to type in the name of the movie they want to search for. The results panel, located right beneath the search bar, displays the top 5 results that match the input received from the user. Additionally, filters of numerous movie categories are provided right below the results panel so that users can apply filters of their favorite categories. Finally, located to the right of the results panel, two additional input fields are provided to gather user input on the name of any cast member (actors/actresses/directors) and keywords associated with specific movies alongside a selection panel to collect user input on the ratings of the movie they want to search for.
- **How the users can interact with this screen:** The user can access the Detailed Search modal by clicking the Search Icon on the navigation bar on the Home Page. The user can then type the name of the movie that they want to search for and select the desired movie from the results panel. Additionally, the user can apply filters on certain movie genres by checking the corresponding checkboxes. Furthermore, the user can enter keywords or a name of any cast member (actors/actresses/directors) in their respective input

fields to search for movies with the given keywords/cast member. Last but not least, the user can search for movies based on their ratings by selecting a rating ranging from 1 star to 5 stars on the selection panel.
